Asian Paints introduces Anti-Damp Technology in Ace & Tractor Emulsions

Mumbai, In today's evolving home décor landscape, homeowners are raising the bar for what their homes should deliver, spaces that look good, feel welcoming, and stand the test of time. Yet, in the economy segment, bringing together aesthetics, durability and affordability has often remained a difficult balance to achieve. Among the most common concerns are water marks on walls, an issue that can quietly take away from the beauty of an otherwise well-maintained home. Addressing this need, Asian Paints has introduced Anti-Damp Technology in its popular Ace and Tractor Emulsions. In addition, the products offer a 4-year warranty on key performance aspects, bringing together long-lasting performance and value in one offering.

Ace and Tractor Emulsions, two of Asian Paints' most trusted and widely used brands, have over the years built strong equity among dealers, contractors, and homeowners. Known for delivering consistent value in the economy segment, the portfolio has continually evolved with thoughtful innovations, from its Tractor and ACE Sparc range, offering superior value proposition to its Tractor and Ace Shyne range, offering affordable sheen, each designed to meet real consumer needs.

Speaking on the campaign, Rajesh Sharma, Head of Strategy, McCann India said, "Indian homes are extensions of personal pride. Which is why water marks are rarely just a wall problem. It chips away at how people feel about their own space. Instead of dramatizing the issue we chose humour, because the most effective way to confront an everyday truth is to make people laugh at how familiar it already is." Amit Syngle, MD and CEO of Asian Paints Ltd., said, "Across India, we are seeing a clear shift in consumer expectations, where performance and aesthetics are equally important, regardless of the price segment. At Asian Paints, we have consistently anticipated these evolving needs and worked to democratize innovation at scale. Our offerings in this segment are supported by a 4-year warranty on key performance parameters, reinforcing reliability and long-term value. The introduction of Anti-Damp Technology in Tractor and Ace Emulsions takes this commitment further, bringing dependable protection against water-mark related concerns to the economy segment and expanding access to meaningful innovation for every Indian home."

India's SME exporters remain optimistic amid escalating global and family business risks

Mumbai, The Centre for Family Business & Entrepreneurship (CFBE) at Bharatiya Vidya Bhavan's S.P. Jain Institute of Management and Research (SPJIMR), Mumbai, has released its Indian SME Family Business Trade Confidence and Internationalisation Report, a comprehensive study of export confidence among India's SME family businesses.

Conducted in partnership with Hansa Research, the survey drew on 461 responses from owner-managers, directors, CEOs, and senior leaders of Indian SME family businesses actively engaged in international trade. Respondents represented 14 cities — from Ludhiana to Hyderabad and Jaipur to Kolkata — spanning every business-size category, every generational stage, and major industry, from manufacturing to trading.

On average, these firms have been exporting for 16.4 years, with 82% reporting more than a decade of international trading experience.

The report is the first of its kind to deploy a four-index architecture that measures trade confidence holistically, separating forward-looking optimism from current risk burden, risk trajectory, and family governance tensions, before combining them into a single Net Trade Confidence Score (NTCS).

The 17.9-point gap between the TCI (74.3) and the NTCS (56.4) emerges as the report's most significant finding. It quantifies a tension familiar to exporting SME family business across India: the gap between what businesses believe they can achieve and the environment in which they must operate.

Reflecting on the central paradox her research uncovered, author Tulsi Jayakumar, Executive Director — CFBE and Professor of Economics and Policy at SPJIMR, offered this assessment of what the data truly reveals: "Our data captures something that aggregate trade statistics simply cannot: the lived experience of an Indian SME exporter who is genuinely optimistic about what their business can achieve, while simultaneously navigating a risk environment that is hostile across every dimension and worsening across every trajectory. The 17.9-point gap between the TCI and the NTCS is not a rounding error; it is the quantitative expression of a structural tension that policymakers and support institutions can no longer afford to treat as background noise."

The report's findings carry direct implications for policymakers and institutions across India's export support ecosystem. Prof. Jayakumar has distilled the findings into six specific policy recommendations, each with identified mechanisms, responsible parties, and measurable outcomes.

India's services PMI rises to 59.8 in May over new business growth

New Delhi, June 3 (IANS) India's services PMI rose to 59.8 in May, from 58.8 in April, amid strengthening demand for freight, digital solutions, e-commerce, entertainment and IT, which boosted new business growth, the HSBC India Services PMI data showed on Wednesday.

As a result, companies lifted activity to a greater extent and continued to add to payroll numbers. Although cost pressures remained historically high across India's service economy, they receded to their lowest in four months, which supported a moderate increase in selling prices that was the softest since January, showed the PMI data. "India's services PMI signalled an expansion in business activity in May, supported by a continued rise in new business. External de-

mand for India-provided services also grew at a faster pace, rebounding after a sharp decline in April. Input cost inflation eased, which, in turn, reduced pressure on selling prices," explained Pranjal Bhandari, Chief India Economist at HSBC.

New orders placed with Indian service providers rose to the greatest degree in six months halfway through the first fiscal quarter, moving further away from the slowdown seen in March. The expansion in international orders was nevertheless solid, with firms citing gains from Australia, Canada, France, Germany, Hong Kong, Malaysia, the UAE and the UK, the PMI data showed.

India on path to become global leader in Bio-Economy sector

New Delhi, June 3 (IANS) Several positive factors, including increased policy support for sustainable agriculture and targeted bio-economy initiatives, will lead India on the path to become a global leader in the domain of Bio-Economy and bio-based agri-input sector, according to the government. According to Tejveer Singh, Secretary, Department of Chemicals and Petrochemicals (DCPC), India has an immense potential to emerge as a global leader in the Bio-Economy and bio-based agri-input sector, due to its strong scientific base, rich biodiversity and rapidly growing startup ecosystem. The DCPC Secretary expressed confidence that scientific excellence, effective Industry-Academia partnerships, and the technological contributions of emerging young innovators will shape the sustainable ag-

ricultural solutions of tomorrow. Singh also emphasised that the ultimate success of bio-pesticides also depends upon the development of robust formulation technologies that can enhance product stability, field efficacy, ease of application, and overall farmer acceptance. The 'BIOPSF 2026' event was organised by the Institute of Pesticide Formulation Technology (IPFT), Gurugram — an autonomous institution under the DCPC, Ministry of Chemicals and Fertilisers. The Secretary added that as India advances toward its vision of "Vikshit Bharat 2047" and a robust Bio-Economy, there is a growing need to strengthen indigenous technological capabilities, promote translational research, and encourage startup-led innovation in bio-based chemicals, crop protection technologies, and sustainable agricultural inputs.

TCS, Infosys, Wipro cross 3 lakh Copilot users in major AI push

New Delhi, June 3 (IANS) India's three leading IT services providers - Infosys, TCS and Wipro -- have collectively expanded deployment of '365 Copilot' to more than 3 lakh employees within six months, marking one of the world's largest enterprise artificial intelligence (AI) rollouts, Microsoft said on Wednesday.

The US-based technology giant said each of the IT majors has now scaled Microsoft 365 Copilot deployments beyond 100,000 employees, expanding from around 50,000-seat deployments announced in December 2025.

According to Microsoft, the milestone reflects a broader shift towards integrating AI agents into business-critical workflows, with enterprises increasingly embedding AI across engineering, service delivery, productivity and business operations. In addition, the rapid expansion positions India among the fastest-growing markets for enterprise AI adoption in Asia, with domestic technology firms emerging at the forefront of large-scale deployment.

Microsoft Commercial Business CEO Judson Althoff said AI's impact at such scale is no longer limited to productivity gains but is increasingly shaping how organisations operate, compete and grow.

The company said 365 Copilot is witnessing accelerating global adoption, with paid seats growing to around 20 million worldwide and quarterly additions increasing by more than 250 per cent.

At Infosys, Copilot adoption has expanded to more than 100,000 employees, with monthly active usage exceeding 91 per cent as the company integrates AI across delivery, engineering and corporate functions.--IANS

Group Mangalam Enters Nutraceuticals & Wellness Sector

Ahmedabad, 3rd June 2026: Group Mangalam, a multinational conglomerate with a rich legacy of 8 decades has announced its foray into Indian nutraceuticals and wellness sector with the launch of NEAT EVERYDAY- its a new

brand. Marking its retail debut, the brand has simultaneously opened five stores across Ahmedabad, featuring an experience center at Prernatirth Derasar Road, alongside four strategic outlets at Bodakdev, South Bopal, Memnagar (Surdhara Circle), and Nehrunagar. This brick-and-mortar rollout aligns with 'Neat Everyday's long-

term strategy to capture a significant share of India's wellness economy by simplifying everyday

self-care routines. The flagship store is meticulously designed to offer urban consumers an immersive, interactive, and seamless sensory shopping experience.

The launch comes at a time when India's nutraceuticals, wellness, and preventive healthcare sectors are experiencing robust growth. India's nutraceuticals and wellness market is projected to reach approximately \$30 billion by 2027, driven by rising consumer demand for preventive healthcare, clean-label products, and holistic wellness solutions.

Business Brief

HSBC MF launches RedHex Hybrid Long-Short Fund (SIF)

Mumbai, HSBC Mutual Fund has launched RedHex Hybrid Long-Short Fund, a Specialised Investment Fund (SIF) strategy designed for investors seeking regular returns and capital appreciation. The strategy combines investments across asset classes - fixed income, equity arbitrage, REIT and INVIT units to pursue risk adjusted returns across market cycles. The New Fund Offer (NFO) will be open from 2 June 2026 to 16 June 2026.

SIFs were introduced to bridge the gap between traditional mutual funds and higher-ticket products like Portfolio Management Services (PMS) and Alternative Investment Funds (AIFs). RedHex Hybrid Long-Short Fund offers an intermediate investment that combines the regulatory transparency of mutual funds with portfolio flexibility. The product is suited for 'mid-ticket' investors, with a minimum application of Rs. 10,00,000 (Rs. 1,00,000 for Accredited Investors). Kailash Kulkarni, CEO, HSBC Mutual Fund, said, "Investors today are more aware and require unique solutions that are professionally managed, and built to navigate complex market conditions. RedHex Hybrid Long-Short Fund is designed as a practical middle ground - offering the clarity investors expect from mutual funds, with added flexibility of a product which is designed to be less volatile while giving superior, tax efficient risk adjusted returns. Shriram Ramanathan, CIO Fixed Income, HSBC Mutual Fund, said, "Our focus is on robust credit selection and risk controls, aiming to deliver high accrual potential with lower volatility across market cycles. In a measured way, the fund also aims to take exposure to REITs and INVITs, both of which are growing asset classes"

Tata Motors Launches the All-New Intra V40; Strengthens Alternate Fuel Leadership in Small CVs

Mumbai, Tata Motors, India's largest commercial vehicle manufacturer, today accelerated its push in alternate fuel mobility with the launch of the all-new Intra V40, reinforcing its leadership in the fast-growing small commercial vehicle and pickup segment. Designed for high-load, high-efficiency operations, the Intra V40 combines CNG + petrol bi-fuel technology with a best-in-class payload of 1,525 kg and a 2,960mm (9.7ft) long load body, enabling operators to maximise earnings while ensuring uninterrupted operations across varied routes. Powered by a 1.2-litre engine delivering 58 bhp of max power and 106 Nm of max torque, the Intra V40 is engineered to deliver strong performance with superior fuel efficiency for demanding last-mile applications. Its 110-litre CNG tank supports extended range, while the bi-fuel architecture ensures flexibility across fuel types and uninterrupted operations.
